

MORMON BREAKOUT

December 2016

Scenario - The Missionary Apartment

You are missionaries in a missionary apartment.

You leave for a teaching appointment and realize that you forgot something. You rush back into the apartment to retrieve the item....and the door locks behind you! It is an old, fidgety and unpredictable door lock. And to make things worse, the door lock has a four digit code that you do not know.

(Point out 4 digit lock on exit door)

The missionaries who lived in the apartment before you, knew the code, but they didn't want to make it easy on you. As a practical joke, they hid clues and hints in the room that will eventually lead to solving the final puzzle - which will give you the final 4 digit lock and free you from the apartment.

Hurry! Your teaching appointment starts in one hour. Your time starts now!

(start the 60 minute timer, leave and close the door)
